THE RELIABLE EXPERT

IDEAL FOR RUGGEDIZED COMPUTING

Choosing the right connectivity solution is paramount. Fischer Connectors' solutions are designed to excel in extreme environments.

RUGGED & SEALED

Fischer Connectors' solutions meet or exceed military and IEC standards when it comes to ruggedness and sealing for use in extreme environments. Our IP68 sealed solutions are tested at a depth of up to 20 meters (Fischer MiniMax™ Series) or up to 120 meters (Fischer UltiMate™ Series) for 24 hours.

COMPACT

Up to 3x smaller

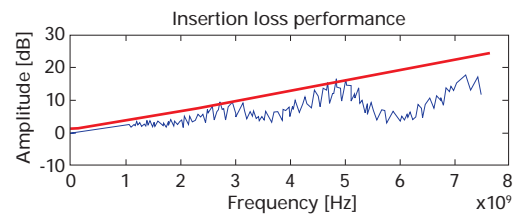

than comparable 19 pin MIL-STD-38999 connector, dramatically reducing the size and weight of your devices.

ULTRAFAST

Fischer Connectors' connectivity solutions enable ultrafast data transmission, even in the field, allowing reliable and timely access to critical information.

		HDMI		
Fischer UltiMate™ Series	1 Gb/s	✓	✓	Application dependent
Fischer MiniMax™ Series	10 Gb/s	✓	✓	Application dependent

OPTIONS FOR SECURE PORTABLE DATA

When you need to store and transport your critical data safely and securely, the Fischer Rugged Flash Drive is ideal. This robust memory stick has a virtually indestructible shell and offers IP68/69 sealing, which protects your data from extreme temperatures, shock or vibration.

With UltiMate or MiniMax receptacles integrated into the rugged computer, you can interface directly with the Fischer Rugged Flash Drive for read and write operations. For standard computers, a USB adaptor cable is available.

FISCHER RUGGED FLASH DRIVE

Available with UltiMate and MiniMax interfaces.
